Intended activities according to major product classes

Mode of action (select and specify as clear as possible)

Bio-stimulant: (direct effects on plant growth and/or development, e.g.: phytohormonal activity)

- Direct stimulation of root growth and/or development:
- Direct stimulation of shoot growth and/or development:
- Induction of generative development:
- Growth regulatory effects:
- Enhanced mycorrhization:
- Enhanced resistance to abiotic stresses:
- Others:

Bio-fertilizer: (improved mineral nutritional status of the plant)

- Biological nitrogen fixation:
- Solubilization of mineral nutrients:
- Mineralization of organic compounds:
- Others:

Application purpose and/or target organisms other than the crop itself (common and scientific name) (Specify as clear as possible):

Bio-control: (Biological control of pathogens, pests and/or weeds)

- Induced resistance:
- Promoting plant defence mechanisms:
- Competition for resources:
- Hyperparasitism:
- Production of antibiotics or other toxins:
- Others:

Target organisms:

- Fungi:
- Bacteria:
- Pests:
- Virus:
- Others:
